-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION***Double Patenting***

The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Claims 19-21 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-6 and 10-15 of U.S. Patent No. 6,036,315. Although the conflicting claims are not identical, they are not patentably distinct from each other because claims 1 and 10 recite optically superior sunglasses having a wrapping frame with a pair of lenses attached to the frame. The frame has a wrapping configuration to result in a wrap angle deviation from 90° (claims 2, 3, 11 and 12). The frame is sized to result in predetermined decentering distance (about 1.0 cm) that eliminates distortion caused by the wrap angle deviating from 90° (claims 6 and 15). The predetermined amount of negative lens power is no more than -0.25 diopters (claims 4, 5, 13 and 14). The claims of 6,036,315 do not specifically state that each of

the lenses is canted with a predetermined amount of negative lens power. The Examiner takes Judicial Notice to the fact that pantoscopic tilting of an ophthalmic lens is a well known alternative to adding (or subtracting) a slight power to a spectacle lens system. Therefore, it would have been obvious to one of ordinary skill in the art to cant (tilt) the lenses of claims 1 and 10 of 6,036,315 in an amount equivalent to the combination of the recited front surface and back surface powers of the lens, since it is well known that they provide equivalent power.
